Education

Institut Teknologi Sepuluh Nopember

July 2020 – Sept 2025

BS in Computer Science / Informatics Engineering

- **Coursework:** Cloud Computing (A), Network Security (A), Cryptography (A), Database Systems (A), Algorithms (A), Data Structures (A), Network Programming (A), Machine Learning (AB), Framework Based Programming (AB), Software/Application Security (AB), Requirement Engineering (AB)
- **Thesis:** Machine Learning, Frequent Pattern Mining and Statistical based Web Honeypot Attack Data Analysis: SNARE and Tanner
- **Notable Awards:** 1st Place FTIRS Business Competition (FBC) 2024 (National), Won 12M funding from ITS Youth Technopreneurship (IYT), 4th Place Heroes Cyber Security (HCS) ITS CTF 2023

Ruang Guru Go Backend Engineering Bootcamp

August 2022 – Dec 2022

Bootcamp / Apprenticeship in Backend Engineering

- GPA: 3.85/4.0 ([view certificate](#) [🔗](#))
- **Coursework:** Backend with Data Structures and Algorithms, Unit Testing (GinkGo), JWT, OAuth2, Concurrency, RESTful API, gRPC, MVC, Clean (Hexagonal) Architecture, ERM, Postgres, GORM, also Gin to DevOps such as Redis, Docker, Kubernetes, RabbitMQ, Grafana, and more.

Experience

Head of IT; Fullstack, DevOps and Security Engineer

Surabaya, East Java

Volvinco

Apr 2024 – present

- Built the entire IT infrastructure from scratch from Backend to Frontend, Cloud, DevOps with server security hardening and security best practices.
- IT Lead on three Fullstack Web Apps clients' projects (Muncak Kuy, Epipla and Kos KaKa)

Penetration Tester

Surabaya, East Java

Direktorat Pengembangan Teknologi dan Sistem Informasi (DPTSI) ITS

Sept 2024 – Jan 2025

- Security Tested 20 Web Applications. Found hundreds of small-medium and several high-critical level vulnerabilities such as Database Leak (SQLi) and Gained Admin Access (Broken Access Control).
- Utilized both automated (with tools like NMap, SQLMap, Nessus, Nikto, Dirsearch and more) and manual OWASP Pentest Methods (with tools like Burpsuite and OWASP Zap [for reconnaissance and spidering]) on both Network and Application sides.

Project Lead; Fullstack Engineer

Bekasi, West Java

PT. Kayaba Indonesia

Aug 2023 – Dec 2023

- Designed (ERM, Flowchart, requirement gathering & analysis, and more) based on SDLC (Agile) method and implemented Training Center Administration ERP Fullstack Web App with LEMP stack by directly and continuously communicating with the head of IT department, head of recruitment and direct mentor(s).
- Increased PT. Kayaba's training efficiency by %.

Backend Lead; Backend Developer

StudentsxCEOs League 2022

Surabaya, East Java

Sept 2024 – Jan 2025

- Fully Implemented Backend API with Nodejs, database with MongoDB and Mongoose
- Fully Implemented the API requests using Axios on the Frontend
- Fully implemented the registrations, authentication, RBAC authorization complete with validation and errors using React and Nodejs

Frontend Developer

Schematics ITS 2021

Surabaya, East Java

Sept 2024 – Jan 2025

- Fully Implemented Backend API with Nodejs, database with MongoDB and Mongoose
- Fully Implemented the API requests using Axios on the Frontend
- Fully implemented the registrations, authentication, RBAC authorization complete with validation and errors using React and Nodejs

Projects

Kos KaKa Fullstack App: Boarding House based in Malang

2002

- Lead developer on the app development side from Front to Back.
- Implemented Hexagonal (Clean) architecture with dependency injections and context with timeouts.
- Implemented the database using Postgres and caching with Redis.
- Implemented store REST API, JWT, OAuth2, and chat including group chat functionality with socket programming.
- Tools Used: Makefile, Docker, Go, Gin, Postgres, Nextjs15, Shadcn, SWR, Typescript

Muncak Kuy Fullstack App: Mountain Hiking E-Commerce Startup

2002

- Lead developer on the e-commerce app development side from Front to Back.
- Implemented the vendor and admin privileges using Laravel with Spatie.
- Implemented the user privilege using Nodejs, Typescript and Expressjs.
- Won 12M funding from ITS Youth Technopreneurship (IYT) 2024

Machine Learning, Frequent Pattern Mining and Statistical based Web Honeypot Attack Data Analysis

github.com/name/repo 

- Fixed the outdated Python and Docker source code.
- Generated dataset to train the Machine Learning model using security scanners which simulates real attacker behaviors with OWASP Zap, Nikto and Nuclei.
- Getting real attack data to be used for Machine Learning model training, validation and testing by setting up and hosting the honeypot on Ubuntu VPS.
- Made the statistical, frequent pattern and machine learning based analysis program on Web Honeypot's attack data with Python then visualizing it with Metabase to gain detailed attack insights.
- Tools Used: Python, Docker, Metabase, Bash, Ubuntu VPS, SNARE & Tanner (Web Honeypot)

Tech Stacks

Languages: Go, Python, Node.js, Typescript, PHP, Bash, Java

Frameworks: Gin, Laravel, Express.js, Flask, Nextjs15

Databases: Postgres, MySQL, MongoDB, Firebase, Redis

DevOps/Infra: Docker, Kubernetes, Github Actions, Nginx, RabbitMQ

Cyber Security: Burp Suite, Metasploit, Wazuh, Snort, Cowrie, VirusTotal, AnyRun
